

Vaibhav Sahu

Backend Developer · Python | Node.js | MongoDB | MySQL | REST APIs | React

+91-88409-32330 · vaibhavsahu8840@gmail.com · linkedin.com/in/vaibhavsahu-822474323

Professional Summary

Backend developer with internship experience building and securing a production job portal (Jobiffi) using Node.js, Express.js, and MongoDB Atlas. Skilled in REST API development, authentication & security hardening, database design, and React/TypeScript integration. Certified in Artificial Intelligence (Intel® Unnati) and Cyber Security (IIT Bombay – Mood Indigo). Strong foundation in Python and ML libraries. Currently pursuing MCA at Christ University; focused on shipping reliable, scalable applications.

Technical Skills

Backend: Node.js, Express.js, REST API development, Authentication (OTP, Rate Limiting, Session Security)

Frontend: React.js, TypeScript, Next.js, HTML, CSS, JavaScript

Databases: MongoDB, MongoDB Atlas, MySQL

Languages: Python, JavaScript, Java, C

Tools & DevOps: Git, GitHub, Docker, Linux, Jupyter Notebook, Figma

AI / ML Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, Keras (LSTM), OpenCV, Matplotlib

Mobile (Familiar): Kotlin, Flutter, Android Studio

Experience

Backend Developer Intern | Jobiffi

May 2026 – Jul 2026

- Engineered secure authentication flows including OTP expiry, rate limiting, and user enumeration patches, hardening the platform against common vulnerabilities.
- Built and maintained REST API routes with Node.js and Express.js, powering the job portal's core backend functionality.
- Integrated backend APIs with the React/TypeScript frontend, ensuring reliable and consistent data flow across the application.
- Designed MongoDB data models for Job and Application entities; authored a seed script populating 15 structured job listings for development and testing.

Python & Software Developer | Freelance

2025

- Diagnosed and resolved runtime and logic errors across Python, Kotlin, and Flutter codebases, restoring correct application behaviour.
- Refactored and optimised Android Studio and Flutter applications, improving performance and long-term maintainability.

Certifications

VIUP111 – Artificial Intelligence · Intel® Unnati · EdGATE Technologies · Christ University 2025–26

Cyber Security Training · AcmeGrade · Mood Indigo, IIT Bombay Nov – Dec 2023

Projects

Digital Currency Forecasting System |

Python · Pandas · NumPy · Keras (LSTM) · Matplotlib · yfinance API

- Engineered an end-to-end pipeline from API data ingestion to deep learning inference to forecast cryptocurrency price trends.
- Preprocessed and feature-engineered historical market data using Pandas and NumPy, feeding cleaned datasets into an LSTM model.
- Visualised historical vs. predicted price patterns with Matplotlib, enabling clear model performance analysis.

Image Processing Application |

Python · OpenCV · NumPy

- Built a multi-feature image processing tool supporting enhancement, filtering (sharpen/blur), and Canny edge detection.
- Designed a modular processing pipeline allowing filters and transformations to be composed and applied independently.

Smart Home App — UI/UX Design |

Figma

- Designed mobile app UX for a smart home controller: wireframes, user flows, and high-fidelity interactive prototypes in Figma.

Education

Master of Computer Applications (MCA) | *Christ University, Delhi NCR* Aug 2025 – May 2027

Bachelor of Computer Applications (BCA) | *Amity University, Lucknow* Sep 2022 – May 2025
